I am excited to apply for the Software Engineering Internship at PosterMyWall. I have completed the first two years of my bachelor's degree at the University of Central Punjab in Computer science and am now getting into my seventh semester at the Virtual University of Pakistan. Studying remotely has allowed me to balance my education with professional opportunities, making me confident that I can contribute effectively to PosterMyWall.

Over the past three months, I have been working as an intern at DSME Global Links, a Product Development Services Agency. During my internship, I worked on several high-profile client products, including a digital fueling card targeting corporate and enterprise businesses in Pakistan and Saudi Arabia. This experience has provided me with practical knowledge in software development and project management.

I am always a user of Canva and really inspired by their large scale of design services that they provide and now to be honest, I am impressed by PosterMyWall range of tools for creating designs for personal and business use. As a technology enthusiast, I am eager to learn more about how your engineering team updates designs products and manages large-scale data and updates within PosterMyWall.

Thank you for considering my application. I look forward to discussing how my skills and experiences can benefit PosterMyWall.

You can reach me at tayyebshahzad12@gmail.com or +92-3348427779.

Sincerely,

M. Tayyeb Shahzad
